Portfolio on GitHub

Senior Flutter developer with 5 years of commercial experience. Specializing in Flutter with deep platform integration: real-time video (WebRTC, LiveKit), on-device ML and computer vision, camera, wearable health data, subscriptions. Business-minded: I uncover needs, estimate in hours, run the roadmap and own the outcome.

5 years
in commercial development

6 apps
on the App Store and Google Play

1.5 months
from audit to release of a stalled project

Sales + IT
5 years in sales and e-commerce

TECHNICAL SKILLS

- Swift and Kotlin: native billing, Platform Channels, a watchOS prototype in SwiftUI
- Camera, video, ML and health: native camera SDKs, LiveKit, ONNX, OpenCV, HealthKit, Health Connect
- Subscriptions: StoreKit 2, Play Billing, RevenueCat; store review and rejection fixes; Crashlytics, Adjust
- Clean Architecture, BLoC, TDD; multiple apps from a single codebase via configs

COLLABORATION

- Pair with backend engineers: agree on API contracts and close integrations fast
- Speak up when the backend breaks: report it with logs and expected behavior
- Give specific, timely feedback to designers, backend engineers and clients
- Run demos and status updates directly with clients, making the case in business terms

PRODUCT & MANAGEMENT

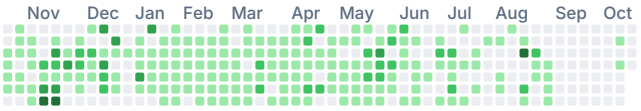

- Run discovery: uncover client needs, formalize requirements and user stories
- Estimate in hours, plan roadmaps with milestones and priorities; ship MVPs on time
- Before IT, ran an online store and an offline business: negotiations, small teams

PROCESS & DELIVERY

- Scrum and Kanban: backlog, sprints, retros; Jira, Linear, Trello, Hubstaff time tracking
- Release cycle: CI/CD, code signing, TestFlight, code handoff to clients; audits of inherited code
- AI agents in daily work for 1.5 years; removed 2,000+ unnecessary widget rebuilds via Dart MCP

KEY PROJECTS 2025–2026

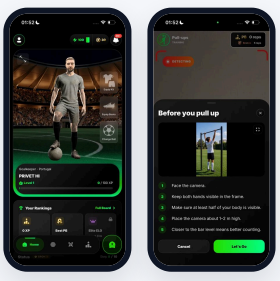

experience — p. 2, screenshots — pp. 3–4

Healthy4u — AI health assistant

2025–2026 · App Store · Google Play

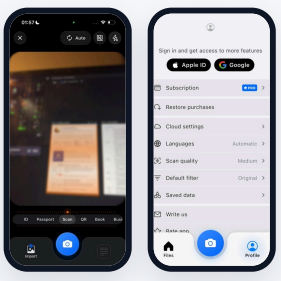

Rewrote it from Swift to Flutter as the sole mobile developer

ProveUp — fitness battles

May – Sep 2026 · TestFlight

Camera-based computer vision, LiveKit video calls, Sign in with Apple

Document Scanner & PDF Editor

Sep – Oct 2026 · iOS & Android

Audit to release in 1.5 months: camera, on-device ML, RevenueCat

Experience

commercial development · Flutter, iOS, Android

Document Scanner & PDF Editor

Sep 2026 – Oct 2026 contract · Senior Flutter Developer · audit to release · iOS & Android

- Joined a project stalled before release: audited the code, documented the architecture and shipped it to the App Store and Google Play in 1.5 months
- Improved the camera on native iOS and Android SDKs: document, ID, passport, QR, book; auto-crop, filters
- Kept scanning, ML and OCR on-device with no custom backend: ONNX Runtime, OpenCV, Tesseract; maintained 8 local plugins and 7 forks
- Built RevenueCat PRO gating: paywall, purchase restore and sync, Apple reviewer access
- Fixed camera jank (DevTools, ML in an isolate, model pre-warming), cut app size; added Crashlytics and Adjust
- Worked on the PDF module: multi-page documents, signatures, export and sharing; PIN-protected folders

Healthy4u · AI health assistant, product startup · App Store · Google Play

Jun 2025 – Sep 2026 in stores · Senior Flutter Developer · sole mobile developer · project put on hold

- Rewrote the native Swift app from scratch in Flutter and shipped it to both stores; Clean Architecture, BLoC, Freezed, TDD
- Rebuilt the AI chat in Flutter: LLM response streaming (SSE), voice playback (TTS), fallback when the quota runs out
- Built native subscriptions and in-app purchases without RevenueCat: StoreKit 2 and Google Play Billing; server-side validation (App Store Server Notifications V2, RTDN) together with the backend developer
- Integrated phone and smartwatch health data: HealthKit (40+ types) and Health Connect; prototyped a watchOS app in SwiftUI
- Passed several App Store review cycles, resolving Guideline 1.4.1 and 3.1.2(c) rejections; added Sign in with Apple and Google
- Set up Firebase Analytics, the Facebook SDK and referrals (Install Referrer, UIPasteControl); delivered the Figma redesign

ProveUp · fitness battles and freestyle football · TestFlight

May 2026 – Sep 2026 contract · Senior Flutter Developer · contract project in parallel with Healthy4u

- Implemented camera-based rep counting with computer vision (juggling, pull-ups, crunches); battles, rankings, missions
- Implemented WebRTC/LiveKit video calls; layered gear avatars composited server-side; Rive animations
- Added Sign in with Apple (ASAuthorizationController, Keychain) and APNs/FCM push notifications per the API contract with the backend
- Set up two builds from one codebase (flavors), migrated to a new Apple developer account, ran TestFlight
- Made the case for StoreKit and Play Billing over Stripe for virtual goods; delivered code per an agreed process

forYou Inc · Oct 2024 – May 2025 · Flutter Developer & Project Manager · Agrotook marketplace · Google Play

- Built the marketplace solo and released it on Google Play: auth, filters, Material 3, i18n
- Ran the project: client requirements, Trello plan and tasks, deadlines; delivered the MVP on time; CI/CD, Docker

Freelance · Mar 2024 – Sep 2024 · Flutter Developer · contract projects

- Revived a 5-year-old legacy VPN app and updated its SDKs
- Migrated a legacy app to Dart 3 and Android 13/14; wrote native Kotlin modules on top of FFmpeg (ffmpeg_kit)
- Built WebView apps with JS bridges and a Telegram Mini App on Flutter Web

Gybernaty Community · Dec 2023 – Feb 2024 · Flutter Developer · gyber.org

Custodial and non-custodial crypto wallets: web3dart, Ankr, Serverpod, BLoC

Kerla · Aug 2023 – Nov 2023 · Flutter Developer · classifieds marketplace · Google Play

Catalog and feed, filters, seller profile, listing creation; Riverpod, Serverpod, PostgreSQL, Docker, CI/CD

Rabotnik24 · Jul 2022 – Jul 2023 · Flutter Developer · hiring platform · Google Play

Large team project: Clean Architecture, BLoC, Freezed, Firebase, Dio; WebView with JS bridges

SFERA · Jan 2022 – Jun 2022 · Junior Flutter Developer · social platform · App Store

First role on a Flutter team; in 2021, commercial front-end development in React

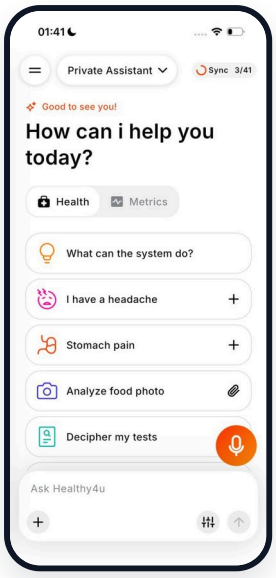

Sales & e-commerce · 2017 – 2021 · manager, own business · before IT

- Launched an online store and an offline business: sales, negotiations, content, small-team coordination in Trello
- Worked with developers as the client: assigned tasks, tested platforms, found bugs, accepted deliverables

Camera: scan modes

PIN-protected folders

PRO via RevenueCat

Joined a project stalled before release and shipped it to both stores in 1.5 months.

- Improved the camera on native iOS and Android SDKs: document, ID, passport, QR, book
- Kept ML and OCR on-device, no custom backend: ONNX Runtime, OpenCV, Tesseract
- Set up RevenueCat PRO gating: paywall, Apple reviewer access
- Profiled with DevTools and fixed camera jank: ML in an isolate, model pre-warming
- Added Crashlytics and Adjust; worked on the PDF module: signatures, export, PIN-protected folders

Projects 2022–2025

screens from store listings and working builds

Marketplaces, a hiring service and a crypto wallet — in teams and solo, from first screen to release

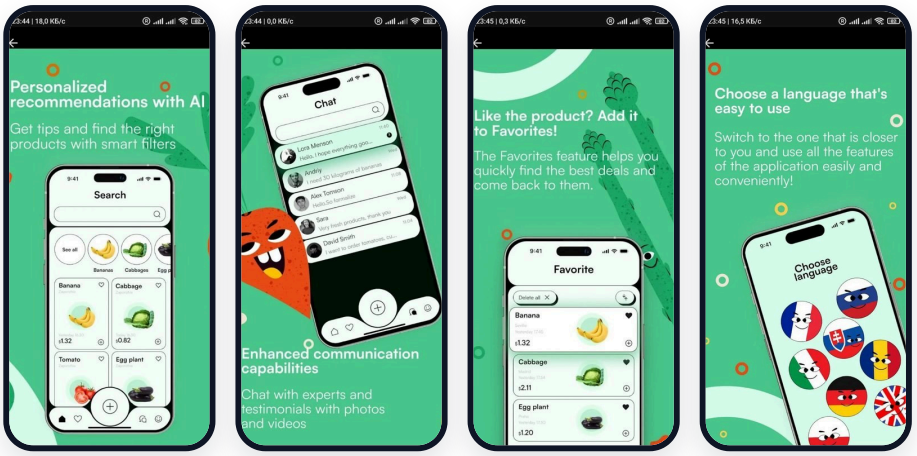

Agrotook

forYou Inc · Oct 2024 – May 2025

Google Play

- Classifieds board for the Spanish agricultural market: built solo and released on Google Play
- Ran the project: requirements, Trello plan, deadlines; MVP on time
- Auth, filters, listings, localization

Screens: Google Play promo images

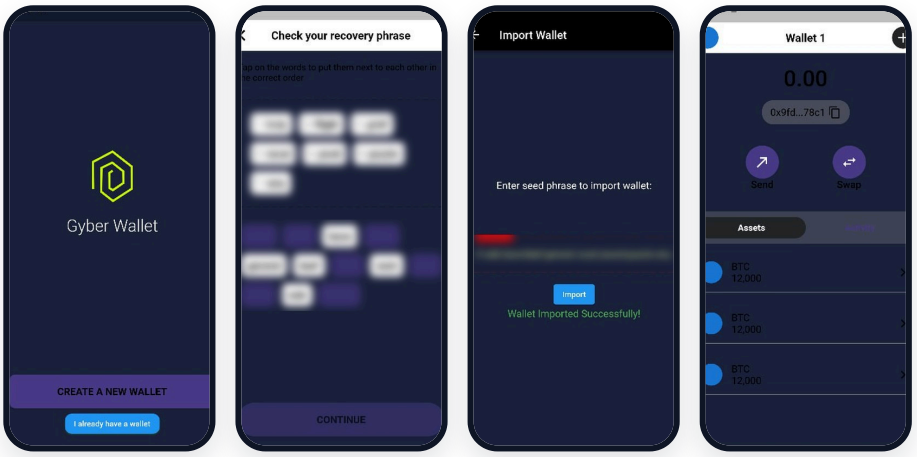

Gyber Wallet

Gybernaty · Dec 2023 – Feb 2024

gyber.org

- Custodial and non-custodial crypto wallet: create and import, seed phrase, assets
- web3dart, Ankr, Serverpod, BLoC; distributed team

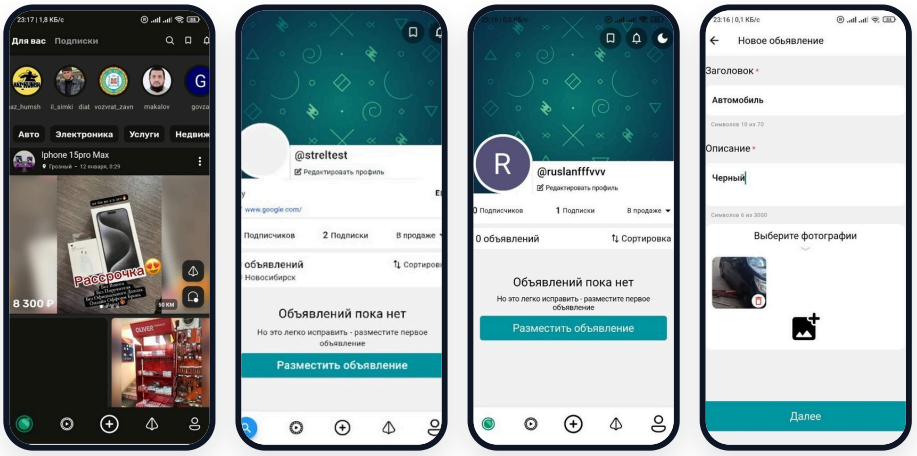

Kerla

Aug – Nov 2023

Google Play

- Classifieds marketplace: feed, categories, profile, posting
- Riverpod, Serverpod, PostgreSQL, Docker, CI/CD

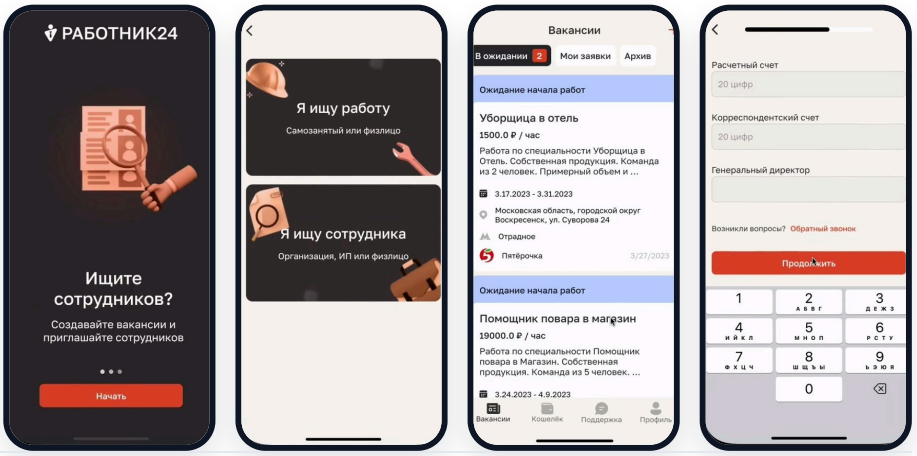

Rabotnik24

Jul 2022 – Jul 2023

Google Play

- Hiring platform: user roles, openings, applications, company details
- Large team project: Clean Architecture, BLoC, Freezed, Firebase, Dio; WebView with JS bridges

Tech stack

Flutter + native iOS & Android + process

FLUTTER & ARCHITECTURE

Flutter 3 · Dart 3 · BLoC / Cubit · Riverpod · Provider · Clean Architecture · Freezed · Injectable / GetIt · AutoRoute · Isolates · Platform Channels · Flavors & configs · Flutter Web · Telegram Mini App

NATIVE IOS

Swift · SwiftUI · watchOS (prototype) · StoreKit 2 · AVFoundation · AVQueuePlayer · Sign in with Apple · Keychain · APNs · UIPasteControl · Code signing & profiles · TestFlight

NATIVE ANDROID

Kotlin · Google Play Billing · FFmpeg (ffmpeg_kit) · Install Referrer · Keystore & signing · Deep links · Android 13/14 permissions · WebView · JS bridges

CAMERA · CV · ML

Native camera SDKs · Patched plugin forks · Computer vision · On-device ML · ONNX Runtime · OpenCV · OCR (Tesseract) · Edge detection · Image filters · Inference in isolates · DevTools profiling

VIDEO · REAL-TIME · AI

WebRTC · LiveKit · WebSocket · SSE streaming · LLM integrations · TTS · Dio · Retrofit · REST · gRPC

MONETIZATION · ANALYTICS

RevenueCat · In-App Purchases (IAP) · Server-side validation: App Store Server Notifications V2 · RTDN · Paywall · PRO gating · Firebase Analytics · Crashlytics · Adjust · Facebook SDK · Referral programs · App Store & Google Play review

DATA · AUTH · PUSH

HealthKit · Health Connect · Firebase · Serverpod · PostgreSQL · Supabase · ObjectBox · Hive CE · SQLite · Secure Storage · Offline-first · Sign in with Apple / Google · OAuth 2.0 · FCM

UI · ANIMATION · MEDIA

Material 3 · Rive · Figma to code · fl_chart · just_audio · slang (i18n) · Responsive layouts

TESTING · BUILD · DEVOPS

TDD · Unit / widget tests · bloc_test · mocktail · GitHub Actions · CI/CD · Fastlane · Docker · FVM · --dart-define

PROCESS · AI-ASSISTED DEVELOPMENT

Claude Code · Cursor · Agentic pipelines · Reviewer agent · Figma MCP · Dart MCP · Scrum · Kanban · Jira · Linear · Trello · Hubstaff · Notion · Estimates in hours · Roadmaps · Code audits · Postman · git-flow
